

NP 01 - stainless steel dividing partition between urinals

NP 01 - stainless steel dividing partition increases significantly comfort, hygiene and privacy in public toilets. We recommend it for use mainly in new buildings, where the intention of better equipment of men's toilets is. In standard version type the partition is made of stainless steel AISI 304 with matt surface finish (sandblasted) which is very well-washable. On request it can be manufactured in other sizes to meet customer's requirements. NP 01 meets all the EU standards for toilet equipment.
