

KB1 - cantilever for wall hung bidet

Our cantilevers assure a steady load between the floor and the walling. This allows the wall-hang closets to be fixed onto the walls with a lower load capacity. Cantilevers are not suitable for mounting onto a plaster slabs. It is possible to fix the cantilever by notching or by using a frontal brick walling. The KB 1 cantilever is intended for hanging a bidet bowl onto bearing pins. Advantages of the KB 1: - for hanging bidets with spacing of assembly screws 180 and 230 mm - setting of the sitting height in the range of 390 ? 490 mm - wide range of interact spacing between assembly screws, connecting armatures and the outlet pipe.
