

AFO 03 D - stainless steel drinking fountain for children

AFO 03 D is a new smaller version of AFO 03 drinking fountain. It is designed for children in kindergartens and elementary schools. AFO 03 D is intended for indoor as well as outdoor use - its construction enables easy removal to prevent the valve from freezing and destruction. The conical body gives the fountain an interesting shape and makes it a suitable complement to the interior of public buildings. A good combination of brushed and sandblasted surface finishes creates a special look of the fountain. The fountain is manufactured from the stainless steel AISI 304. For cleaning we recommend WÜRTH detergents ? material preservation (no. 0893 121 K) and material cleaning (no. 893 121 1).
