

ASO 03 - dryer for 3 pairs of shoes ? with komaxit surface finish

ASO 03 is a dryer with komaxit surface finish designed to dry 3 pairs of shoes. Drying is ensured by forced heated-air flow which prevents hot & humid environment convenient for bacterial multiplication as in systems without the air flow. The delivery includes long revolving arms suitable for boots ? e.g. for ski boots, wellingtons, etc. The dryer can be placed in open space on the floor, by the wall (it includes a balancing stand) or can be attached to wall (using a bracket included in the delivery). The dryer is equipped by single-ended cord on one side and by a connector on the opposite side ? more dryers can therefore be connected in series. If required the dryer can be equipped by ozone generator to kill disease-producing bacteria. The dryer must be located in a ventilated room to avoid unacceptable concentration of harmful ozone.
