

ZAC MAS - safety power-supply for MAS 2 up to MAS 8

ZAC MAS and ZAC 1 are a safety power-supply units intended for AZP Brno coin-operated controls and related electrical sanitary equipment and devices. The sources contain a safety transformer. ZAC MAS unit is equipped with a switch that enables the unit to be switched off from the electricity supply. There are two other positions on the switch: VALVES SWITCHED ON ? enables constant connection of the controlled device or CONTROL SWITCHED-ON - enables connection through the control ? for paid operations. The ZAC MAS source of power supply can be used for either surface or subsurface assembly.

Description ZAC MAS and ZAC 1 are a safety power-supply units intended for AZP Brno coin-operated controls and related electrical sanitary equipment and devices. The sources contain a safety transformer. ZAC MAS unit is equipped with a switch that enables the unit to be switched off from the electricity supply. There are two other positions on the switch: VALVES SWITCHED ON ? enables constant connection of the controlled device or CONTROL SWITCHED-ON - enables connection through the control ? for paid operations. The ZAC MAS source of power supply can be used for either surface or subsurface assembly.
Requirements for setting up the construction

- 1. Set up cable for power supply 230 V, 50 Hz ? CYKY 3C x 1,5.
- 2. Set up alcove for subsurface installation ? size according to installed source.
- 3. Set up distribution of electricity to device according to the requirements for setting up construction of the device

Basic technical information	Input voltage	230V, 50Hz
	Output voltage	12V, 50Hz
	ZAC 1/20	
	Capacity	125 VA
	Coverage	IP 42
	Weight	4,2 kg
	ZAC 1/50	
	ZAC MAS
